

**Think while it's still legal**

## **CORONA CIRCUS**

Norway has now appeared in the world news again: this time for clocking the highest number of death victims per given injection of this experimental gene therapy (EGT), mistakenly called the 'Covid-19 vaccine': e.g. here, in the BMJ, on the many deaths in Norway, 15/01/21:

<https://www.bmj.com/content/372/bmj.n149/rapid-responses> (read the comments in particular)

At the same time, other countries have recorded many deaths shortly after administration of this EGT. Why Norway leads is unclear. The two largest risk factors for dying from Covid-19 (C19) are vitamin-D deficiency and prior receipt of the flu vaccine. Both factors were certainly present in the Norwegian victims.

[https://medicalkidnap.com/2021/01/16/55-americans-have-died-following-mrna-covid-injections-as-norway-death-toll-rises-to-29/?fbclid=IwAR13Ud8qBqbYTFxbO\\_og41SEpNEKbQYYjXIRkA56CDn36YgrbQfEUVI4IOI](https://medicalkidnap.com/2021/01/16/55-americans-have-died-following-mrna-covid-injections-as-norway-death-toll-rises-to-29/?fbclid=IwAR13Ud8qBqbYTFxbO_og41SEpNEKbQYYjXIRkA56CDn36YgrbQfEUVI4IOI)

Singapore and China have stopped using Pfizer's experimental gene therapy:

(<https://childrenshealthdefense.org/defender/china-health-experts-suspension-covid-vaccines-norway/>).

Scientists from Australia and New Zealand are calling for a halt of the Astra-Zeneca 'vaccine' trial:

<https://www.smh.com.au/national/scientists-call-for-pause-on-astrazeneca-vaccine-rollout-20210112-p56tjt.html>

California stops injections with Moderna Covid 'vaccine' due to too many side effects:

<https://on.rt.com/azp5>.

Italian court decides there is not enough research on C-'vaccines' and demands an investigation committee: <https://childrenshealthdefense.eu/children-health/breaking-public-prosecutor-orders-investigation-into-vaccine-quality-control-and-says-scientific-answers-are-needed-italy/>

I have a hard time believing that the FHI (Norwegian CDC) and the Norwegian Medicines Agency, led by director Steinar Madsen, have not received the many warnings about serious side effects:

### **Some background information:**

Real vaccines contain proteins from microbes (viruses or bacteria), to which our immune systems should respond by forming antibodies. This so-called Covid-19 'vaccine' does not contain proteins from C viruses, but synthetic (artificial) mRNA fragments, wrapped in nano-particles of fat, that are supposed to prevent our immune systems from attacking and removing this software. This mRNA should then be built into our cells, not only in the muscle, where the syringe is inserted, but with blood flow, it spreads throughout the body, including to the brain, where it is likely to be implanted into our cells. This 'computer program' (m stands for messenger) is intended to trigger production, in the cells, of the 'spike protein' found on the C

virus, but spike proteins are also found in testicles, placenta and possibly in the brain. Our immune systems then attack these natural proteins because they cannot distinguish between the proteins that sit on the virus and those that sit on our own cells. The potential for autoimmune diseases and possibly infertility is therefore great but you'll only find out in a few years. At that point, it will be too late, because there is no cure or reset-button for this human gene modification and many people are querying whether the patent owner (most often Bill Gates) then owns the people who have been injected/genetically modified.

This genetic technology designed to manipulate our cells into producing both proteins/antigens and antibodies, had never before been tested on humans but now the animal experiment phase has been skipped. In previous coronavirus mRNA 'vaccine' development attempts, almost all the animals died. Use of mRNA 'vaccines' on humans was not authorised until September 2020. On July 17, 2020, the EU also "had to change the rules" because previously, it was forbidden for genetically modified organisms and humans to move around within the EU without a special license (see from 43:00):

<https://www.youtube.com/watch?v=vca1uVerXGQ&feature=youtu.be>

Many specialists expect even more people to experience deadly side effects after the second 'quack' dose, and particularly when, weeks or months later, the recipients come into contact with a natural virus similar to SARS-CoV2. At that point however, the authorities will surely deny any connection so as not to lose face (and freedom).

Also, how is it that the 'vaccine's effectiveness was claimed to be over 90% - the amount required for a license - when on closer inspection, it appears that effectiveness was less than 20% for a cough, fever and/or a runny nose? It has not been shown that this experimental gene therapy protects against infection and serious disease (Covid-19). Why isn't this disclosed? Could it be that no one who has a brain cell left in his head would risk serious side effects from an injection that might possibly protect against coughing for a few months? And why aren't we told that we can never get rid of coronaviruses, which we have lived with for hundreds of thousands of years? Even the manufacturers admit that we will have to live with these viruses (and vaccines) forever:

<https://www.cnn.com/2021/01/13/moderna-ceo-says-the-world-will-have-to-live-with-the-coronavirus-forever.html>

A doctor from Israel concludes that Pfizer's EFT is less than half as effective as alleged:

<https://www.dailymail.co.uk/news/article-9166991/Coronavirus-Israeli-doctor-claims-Pfizersvaccine-effective-expected-one-dose.html>

### **Have we been deceived?**

1. There are laws in all countries, intended to put an end to alternative medicine: deceptive labelling is prohibited when using words with the intent to deceive. So how about a medicine (vaccine) to protect against disease, infection, quarantine, etc. but which doesn't?  
[https://www.davidmartin.world/wpcontent/uploads/2021/01/BotW\\_transcript\\_01112021.pdf](https://www.davidmartin.world/wpcontent/uploads/2021/01/BotW_transcript_01112021.pdf).
2. From Wikipedia: "Vaccines are weak or dead infectious agents or toxins that are supplied to the body to make it immune to the disease the current infectious agent carries with it. A vaccine acts as an antigen and causes the body to begin to form antibodies." In its marketing materials, Moderna makes a point that they have never made a vaccine, but that they are specialised in the use of gene therapy technology as cancer treatments. They put a synthetic nucleic acid (mRNA) in a bed of oily nanoparticles (PEG) to prevent our immune systems from attacking this mRNA, which should act as a computer program ("plug-and-play"), as they themselves describe it here: <https://www.modernatx.com/mrna-technology/mrna-platform-enabling-drug-discovery-development>.
3. PEG is a strong allergen, and antibodies to PEG have been found in 8%-70% of 'vaccine' recipients. The allergic reactions can be fatal and their injection is not a 'vaccine'.
4. This experimental gene therapy (EGT), which they call a Covid-19-'vaccine', has not been shown to

prevent infection/transmission of disease. They even write that it has not been tested for immunity, "because it was impractical to measure infection".

5. So why does 'everyone' call it a 'vaccine'? Is it because no one can recommend or mandate an experimental gene therapy to trillions of healthy people? Because the term 'vaccine' opens up a tsunami of funding, or because manufacturers and advocates are not liable for any harm, as long as it is called a 'vaccine'? If they had been honest and called it EGT, it would not have been possible to get urgent approval two years before the experiment was finished, even during a health crisis.

6. Also, reporting a positive PCR test as an 'infection', is a misrepresentation and a misleading practice; they should all, including the newspapers, be prosecuted. Responsibility for deceptive practices and false advertising cannot be waived.

7. It is a serious offense by gene therapy companies - oddly enough not by vaccine manufacturers, to conduct experimental trials and do so using a deceptive medical practice, which qualifies for lawsuits.

8. Anyone who has experienced serious side effects from this experimental gene therapy from Moderna or Pfizer, or other injections against C19, should therefore file a complaint and claim compensation from the manufacturer. Doctors who recommend EGT as a 'vaccine' should be accused of quackery.

9. Side effects should be reported here: <https://legemiddelverket.no/bivirkninger-ogsikkerhet/meld-bivirkninger>, here: [www.injuredbycovidvaccine.com](http://www.injuredbycovidvaccine.com) and here: [www.vaxxtracker.com](http://www.vaxxtracker.com).

10. Many specialists recommend an autopsy of those who died, because it is easy to distinguish between a fatal reaction after a vaccine, which can be seen in multiple tissues/cells, and one after an infection, which usually appears only on the trachea. Should it prove that a vaccine reaction is likely, one should sue the institution, doctor and/or politicians who recommended the 'vaccination'. It is also important to know whether the deceased was infected with influenza or the Covid-19 virus, and whether he or she had received the correct /effective treatment for C19.

11. In addition, it is important to obtain and freeze the remnants of the vaccine given to find out if it: a) had been destroyed by not being kept at the required very low temperature, b) contained other ingredients of which the doctor had no knowledge, c) contained mRNA fragments from other than SARS-CoV2, such as HIV, as was discovered in Australia.

It is nauseating to listen to Steinar Madsen, the director of the Norwegian Medicines Agency, when he says that these 'vaccines' are safe, knowing that the clinical trial volunteers had to be over 16 and under 75 years of age, and without co-morbidities or allergies. They were also not allowed to drink alcohol or smoke. He also claims repeatedly that the studies were placebo-controlled, knowing that real saline hoax syringes were not used; the so-called 'placebos' were other vaccines known to have many side effects.

As a doctor, he probably also knows that the second injection with the same allergen will probably be fatal. And now the FHI is already warning that more booster syringes are going to be needed because the effect does not last as long as natural immunity after disease ([https://www.nrk.no/norge/fhi - det-er-mulig-vi-ma-gi-en-tredje-vaksinedose-1.15331865](https://www.nrk.no/norge/fhi-det-er-mulig-vi-ma-gi-en-tredje-vaksinedose-1.15331865)).

Several researchers have criticized the studies using these EGT syringes/programs as "manipulated to succeed", which in my world is called cheating:

<https://www.forbes.com/sites/williamhaseltine/2020/09/23/covid-19-vaccine-protocols-reveal-that-trials-are-designed-to-succeed/> and <https://blogs.bmj.com/bmj/2021/01/04/peter-doshi-pfizer-andmodernas-95-effective-vaccines-we-need-more-details-and-the-raw-data/>, CHDE:

<https://childrenshealthdefense.eu/eu-issues/espoir-de-changement-de-gestion-sanitairegrace-a-la-coordination-de-milliers-de-medecins-scientifiques-et-elus-independants-france/>

The risk of dying from Covid-19 is only 0.12 % for all ages:

[https://www.aftenposten.no/norge/i/dl76KB/hva-er-risikoen-for-aa-doe-hvis-du-blir-smittet-i-norge-naa-har-fhi-gjor?fbclid=IwAR1Mg43JwS-3\\_Ed\\_63JBmJGyfyLth7BYhg0-AiZJmgKkoxWuu8Su2QsSfl](https://www.aftenposten.no/norge/i/dl76KB/hva-er-risikoen-for-aa-doe-hvis-du-blir-smittet-i-norge-naa-har-fhi-gjor?fbclid=IwAR1Mg43JwS-3_Ed_63JBmJGyfyLth7BYhg0-AiZJmgKkoxWuu8Su2QsSfl), while the risk

of getting serious side effects from the experimental gene therapy is approximately 3%.

From the US, Austria and other countries come reports that up to 80% of hospital staff refuse to be 'vaccinated'. No wonder! They've probably understood that:

- there is no pandemic, when fewer people died in 2020 than in the previous years. In Sweden, according to their national statistics office, annual death rates per number of inhabitants were much lower in 2020 than in the years 1998-2003, and the same goes for most other countries as well.
- hospitals were not overloaded and several doctors and nurses were laid off.
- an infection with coronavirus (including influenza or a common cold) provides better and longer immunity than a 'vaccine', (<https://www.ft.com/content/929ef3cd-8611-49b2-9f23-918dc3470166?fbclid=IwAR3vmHiL0jaSLsG-0HqvUMBrmFUXpsB2vCRSN4tnXRdAyA2VAZKwPEViDE>)
- the danger of dying from C19 is as high as dying from the common flu ([https://www.aftenposten.no/norge/i/dl76KB/hva-er-risikoen-for-aa-doe-hvis-du-blirsmittet-i-norge-naa-har-fhi-gjor?fbclid=IwAR1Mg43JwS-3\\_Ed\\_63JBmJGyfyLth7BYhg0-AiZJmgKkoxWuu8Su2QsSfl](https://www.aftenposten.no/norge/i/dl76KB/hva-er-risikoen-for-aa-doe-hvis-du-blirsmittet-i-norge-naa-har-fhi-gjor?fbclid=IwAR1Mg43JwS-3_Ed_63JBmJGyfyLth7BYhg0-AiZJmgKkoxWuu8Su2QsSfl)). An analysis of 23 studies from around the world showed a death risk of 0.12% for those over 70 and 0.04% for those under 70 years age,
- studies of blood reserves from the time before C19 showed that over 80% were already immune to different coronaviruses and SARSCoV2 variants (from the book False Alarm, by Dr. W. Wodarg),
- that there are several studies proving much better effects for prevention and treatment, than these EGTs (<https://covid19criticalcare.com/>).

Let me remind you again that NO vaccine or genetic treatment protects as well as vitamin D3 (4000 IE) and zinc (50 mg), and if you still get symptoms of a (lung) infection, I do not recommend hospital, but 500 mg 'Quercetin' from the Health Food Store or a prescription for 'Plaquenil' (HCQ), 200 mg 2 x daily for 5 days. If your doctor doesn't want to prescribe this harmless, effective and affordable malaria medicine, contact me.

### **Some good news for a change:**

1. Brazil's President Bolsonaro is opening up to an Indian vaccine, but he warns his compatriots not to take any C19 vaccines at all and has made it clear that not Brazil, but the manufacturer must pay out, should anyone be harmed.

2. Efforts are being made to find solutions to travel around the world without a mask and vaccine certificate: <https://www.freedomairway.com> and <https://www.youtube.com/watch?v=t9kVxL3kwUc>

3. Trial in Weimar/Germany won: 8 people from 7 apartments met outside a building and received fines. None of them were sick or had tested positive for C19. The judge concluded the following: that there was not an epidemic that could justify quarantine for the healthy, that far fewer than anticipated had died from C19, similar to cases of the flu, that contact between people cannot be punishable, that contact bans (i.e. lockdowns) are also without effect and cost huge amounts of money, that society and especially children suffer, that suicide rates are increasing, that other seriously ill individuals are not receiving treatment in time and that more deaths caused by measures to 'control' the 'pandemic' have been recorded than have been caused by the virus ([https://www.haufe.de/recht/weitere-rechtsgebiete/strafrecht-oeffentl-recht/ag-weimarerklaert-corona-kontaktbeschraenkungen-fuer-nichtig\\_204\\_535026.html](https://www.haufe.de/recht/weitere-rechtsgebiete/strafrecht-oeffentl-recht/ag-weimarerklaert-corona-kontaktbeschraenkungen-fuer-nichtig_204_535026.html)).

4. Austria's Constitutional Court declared most coronavirus restrictive measures to be unconstitutional so they were repealed on 10.12.20:

[https://www.vfgh.gv.at/downloads/VfGH\\_10.12.2020\\_V\\_436\\_2020\\_CovidMassnahmen\\_in\\_Schulen.pdf](https://www.vfgh.gv.at/downloads/VfGH_10.12.2020_V_436_2020_CovidMassnahmen_in_Schulen.pdf)

5. Israel's Human Rights Committee declared that Pfizer is conducting illegal experiments on people:  
<https://www.israelnationalnews.com/News/Flash.aspx/529253>

6. A new Norwegian documentary has come out with footage from the World Freedom Alliance (WFA) giving only facts about Covid-19. This should be shared but especially with those who haven't woken up yet: [https://www.youtube.com/watch?app=desktop&v=9lvPKWlqqf0&feature=share&fbclid=IwAR2\\_RXJQPHDUNUNQ6Ny9qehskzQlAthrm03vhmzoUMP1z-ExLepPaARTpsA](https://www.youtube.com/watch?app=desktop&v=9lvPKWlqqf0&feature=share&fbclid=IwAR2_RXJQPHDUNUNQ6Ny9qehskzQlAthrm03vhmzoUMP1z-ExLepPaARTpsA)

7. On 20.1.21, the WHO changed its recommendations on the unreliable PCR test: now it suddenly states that we sceptics were right all along: this test produces too many false positive results, causing major financial consequences. Now they believe that each person with a positive PCR test should be assessed by a doctor for symptoms and that control tests have to be taken: <https://www.who.int/news/item/20-01-2021-who-information-notice-for-ivdusers-2020-05>. – We should therefore be able to request two new PCR tests, one to send to a national laboratory and one that we can send to a foreign laboratory for 'sequence analysis', to determine whether it is really about SARSCoV2, or influenza. Please contact me to get an address for the foreign laboratory.

Stay safe and sane.

Oslo, on 23.1.21
